2019

#### Volunteer activities

Network penetration testing and bug fixing of Nobitex exchange

2025

#### About Me

I'm Mahdi Salehi – a full-stack developer and UI/UX designer who builds user-centered web and mobile products. As a Computer Engineering student at Torbat Heydarieh, I combine 3+ years of hands-on experience with modern stacks (React, Next.js, TypeScript, Node.js, MongoDB, Firebase) and design tools (Figma, Adobe XD) to deliver polished, maintainable solutions. I specialize in rapid MVP delivery, interaction design, performance optimization, and accessibility (a11y). My workflow covers user research, wireframes & prototypes, front-end and back-end development, testing, and cloud deployment. I focus on clean code, scalable architecture, and measurable UX improvements that increase conversion and retention. Telegram: @aizdb
